# FIRE ACTIVITY

## INLAND REGION (Continued)

### Carr, Vegetation Fire, Shasta County (Continued)

#### **Animal Shelters**

- Shasta Livestock Auction, 3917 Main St., Cottonwood – Small and Large Animals
- Lassen County Fair, 195 Russell Ave, Susanville – Large Animals
- Colusa County Fair, 1303 10<sup>th</sup> St., Colusa – Small and Large Animals

#### **Critical Infrastructure**

- Redding Electric – Residents without power 600
- Pacific Gas & Electric – Residents without power 3,886 and 617 without gas
- Power Plant Operations:
  - Shasta, Keswick, and Trinity Power Plants are operational. Shasta Dam Power Plant is generating 100MV for the cities of Redding and Shasta Lake. Trinity Power Plant is generating 13-20 MV, depending on local demand, and remains the sole source of electricity for Trinity County. Keswick Power Plant is generating 20MV for the City of Redding. This is a temporary arrangement until the grid is checked and normal electrical distribution resumes. All operating power plants are being staffed 24/7. There is no threat or concern to infrastructure at this time. All other USBR power plants in the affected area remain offline and will not restart until after the area is cleared for entry, and the infrastructure is evaluated for safe operation. Additional updates will be provided as information becomes available.
- Trinity Power Plant Water Releases Update
  - Emergency water releases began at Lewiston Dam on July 28, 2018 as a way to continue power supply to local communities and to increase freeboard at Lewiston Dam. Trinity Power Plant increased its water releases to increase its power generation to support Trinity County. These releases caused the downstream Lewiston Dam to release water as well. The release from Lewiston Dam to the Trinity River has been increased to 1,250 cubic feet per second (usual release rates at this time are between 500-750 cubic feet per second). The Bureau of Reclamation dams in the affected area are currently minimally staffed, if operational. Spring Creek and Carr power plants are currently down and will stay down until after the fire is out. There is no power issue. The releases are not a threat to the environment nor to downstream communities – there is no threat of flooding.
- Spring Creek Detention Dam
  - Spring Creek Dam impounds toxic seepage from the Iron Mountain Mine Superfund Cleanup Site upstream on Boulder Creek and is operational. The Iron Mountain Mine has a 7 million gallon waste impoundment that has plenty of storage capacity left with no concern about imminent releases from Iron Mountain. Spring Creek Detention Dam is nearly empty with most of its storage capacity available. Additionally, BOR has a large amount of water stored for dilution purposes should any waste enter the Sacramento River. There is no concern about either Iron Mountain Mine Superfund Cleanup Site or Spring Creek Detention Dam posing a threat to public safety, environment, or water quality. There is no danger of toxic releases from either Iron Mountain Mine Superfund Site or from Spring Creek Detention Dam.
- City of Redding – Water Treatment Plant
  - Threat to chlorine cylinders at Clear Creek CSD abated. Cal EPA provided recommendations and resources on 7/28/18 regarding safety when in proximity to the treatment plant until better situational awareness was available.

# **FIRE ACTIVITY**

## **INLAND REGION (Continued)**

### **Carr, Vegetation Fire, Shasta County (Continued)**

#### **Health and Medical**

- Patients' Hospital of Redding's power remains on and is still under evacuation orders as of 1225 hours on 07/29/18.
- Trinity Hospital's power was out as of 0500 hours, 07/29/18. The back-up generator is working and facility has sufficient water, food, and medications as of 1035 hours on 07/29/18.
- Mercy Medical Center Redding is open and operational. ED is open to all transfers. Hospital command center is active. Facility is staffed 24/7 through weekend.

#### **Missions**

- See Cal OES Mission Tasking Slide

#### **Law Enforcement**

- 10 in-region LEMA; 10 officers per shift. Butte, Siskiyou, Trinity, Lassen and Tehama County agencies contributing
- 4 Fish and Wildlife Officers

# **WEATHER OF CONCERN**

## **Weather of Concern**

### **Northern California:**

- Above average daytime temperatures are expected to continue. A gradual decrease in high temperatures is expected mid week, returning to temperatures to near average.
- A Red Flag Warning remains in effect in the vicinity of the Carr Fire in Shasta County until 0800 hours this morning for hot and dry plume dominated fire weather conditions. Areas of highest threat are near the City of Redding and surrounding areas including Whiskeytown and French Gulch.
- Gusty northwest winds are expected again along the Mendocino coast and in southern Mendocino county. Gusts of 20 to 30 mph are possible this afternoon. In addition, westerly winds will accelerate through east-west oriented canyons and passes in Trinity County this afternoon and evening, which will cause fire weather conditions to become elevated there as well.

### **Southern California:**

- Above normal temperatures are forecast to continue through next weekend.
- Thunderstorms chances continue to be greatest over mountain locations.

# WEATHER SYNOPSIS BY REGION

## **NORTHERN CALIFORNIA**

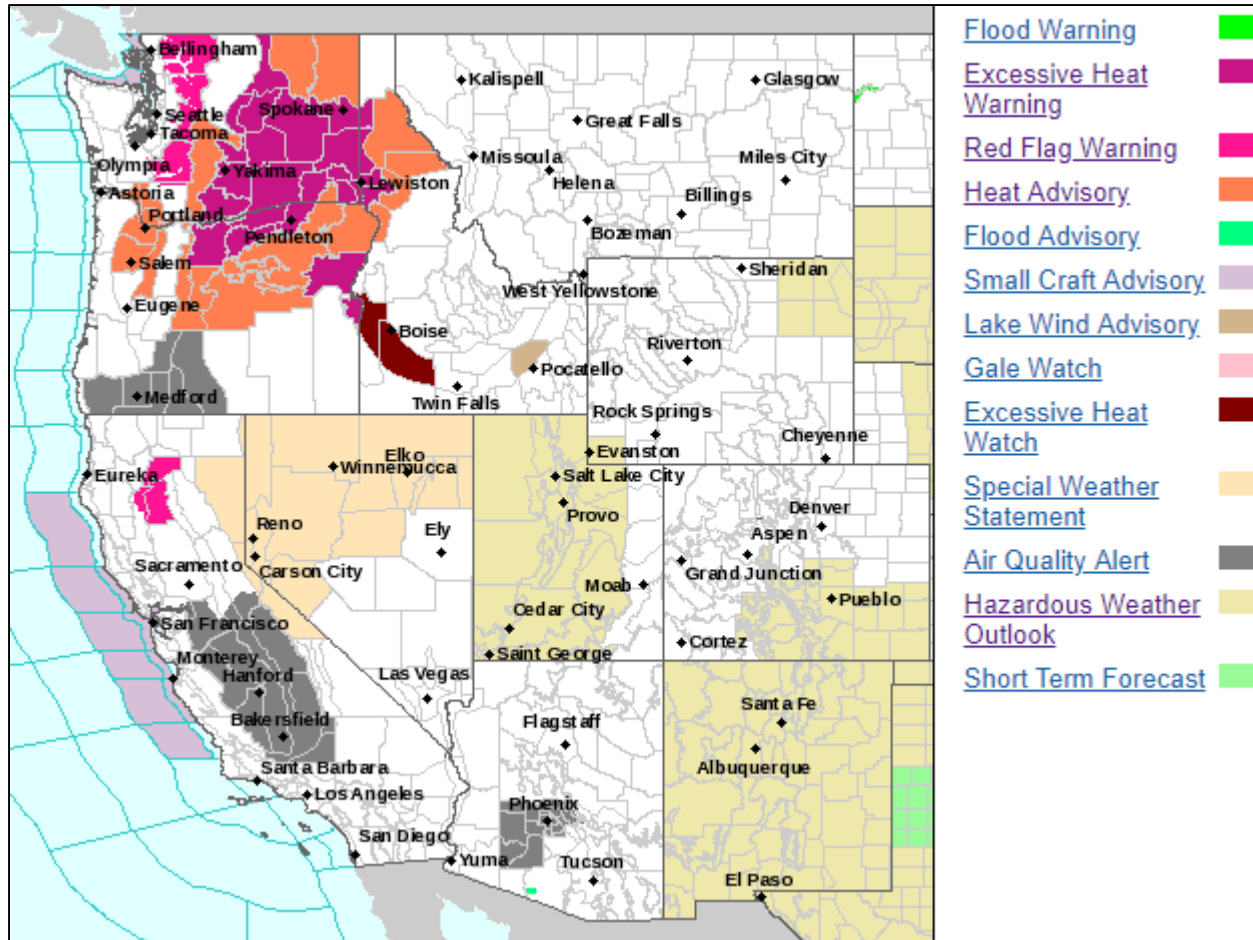

Smoke will help to keep daytime temperatures cooler the next couple of days. The Delta breeze should bring some relief from the smoke to the Delta region and the Sacramento area during the evening and overnight. A gradual decrease in high temperatures is expected mid week, returning to temperatures to near average. Gusty northwest winds are expected again along the Mendocino coast and in southern Mendocino county. Gusts of 20 to 30 mph are possible again this afternoon. In addition, westerly winds will accelerate through east-west oriented canyons and passes in Trinity County this afternoon and evening, which will cause fire weather conditions to become elevated there as well. Temperatures are forecast to gradually cool for the middle of the week, although most inland valleys will continue to see temperatures in the upper 90s to around 100. Although dry weather will prevail, isolated afternoon and evening thunderstorms will be over the mountains and desert through Wednesday.

## **SOUTHERN CALIFORNIA**

Above normal temperatures will continue through at least next week and overnight and morning low clouds become more widespread. The return of higher humidity will result in muggy conditions and a slight chance of thunderstorms in the eastern Los Angeles County mountains for the next few days. Thunderstorms chances continue to be greatest over higher terrain locations. Chances for afternoon thunderstorms near the mountains and high desert will slowly decrease through mid week.
